

**GLC 20**  
**Transferable Skills Buzzfeed List Organizer**

<p>1. Critical thinking and problem solving</p> <p>Debugging code across multiple languages and environments, such as JavaScript, TypeScript, and Luau; analyzing errors; testing solutions; and troubleshooting different operating systems from NixOS to Windows.</p>
<p>2. Innovation, creativity and entrepreneurship</p> <p>Developing web apps and projects with the use of modern tools such as Tailwind, Express, and ESBUILD; trying different frameworks and technologies in search of functional solutions.</p>
<p>3. Self-directed learning</p> <p>I taught myself various programming languages, operating systems, and development tools through documentation, experimentation, and hands-on practice.</p>
<p>4. Collaboration</p> <p>I contribute to coding projects and work with version control systems to share code and collaborate with other developers within the programming community.</p>
<p>5. Communication</p> <p>Writing clear documentation in Markdown, creating web content with HTML/CSS, and explaining technical concepts through code comments and project descriptions.</p>
<p>6. Global competence</p> <p>Engaging with the global open-source community, learning from developers worldwide, and understanding how technology impacts people in various cultures and regions.</p>
<p>7. Technological fluency</p> <p>Demonstrated experience in efficiently working with multiple operating systems: NixOS, Arch Linux, several distros; development environments like VSCode, Visual Studio, Roblox Studio; quick adaptation to new tooling and platforms.</p>
